

A VIDEO OBSERVATION AND
RECORDING SYSTEM FOR
COMPETENCY-BASED
MEDICAL EDUCATION

Strengthen Professional Development With Video

VALT is a secure, stable, video capture system. Use VALT to stream, record, annotate and assess video of clinician-patient interaction, care team collaboration, peer evaluation, resident supervision, and patient observation to help improve patient care.

VALT's reliable architecture hosts more cameras on less equipment and scales to support any number of rooms and buildings, which reduces total cost of ownership. Its easy user interface inspires enthusiastic user adoption and technical safeguards help meet compliance requirements.

Contact sales@ipivs.com and we'll design an affordable audio/video solution for you.

What's new at Intelligent Video Solutions?

One of our core values is continuous improvement, so in 2022 we expanded our ROAM products and launched VALT Cloud to stream and record video anywhere, anytime.

Challenged by the limits of time and space? Get the benefits of VALT in-situ with our ROAM portable recording solutions. Visit www.ipivs.com/roam-solutions to request a quote.

No IT? No problem. VALT Cloud doesn't require on-prem servers or cameras. Our technicians customize and maintain your VALT Cloud instance and all you need is a mobile device. Watch a demo at www.ipivs.com/solutions/valt-cloud.

We **Focus** on Reliable Video Solutions.
You **Focus** on Better Outcomes.
